

Acquisition Proposal: AGI Automation LLC

Submitted to: Anthropic Leadership

Date: January 2026

From: Siddhartha Nagula, Founder & CEO

Contact: ceo@agiagentautomation.com

Opportunity Summary

I built a production-grade AI agent platform that mirrors Claude Cowork—independently, before its launch. Anthropic can acquire AGI Automation LLC to gain proven cross-platform technology, accelerate product expansion, and bring an experienced AI agent builder onto the team.

What Anthropic Gets:

- 465,000+ lines of production code (Rust, TypeScript, React)
- Cross-platform desktop agent (Windows, macOS, Linux)
- A founder with deep expertise in the exact problem space Cowork addresses
- Immediate contribution to Claude Code, Cowork, or agent systems teams

The Strategic Gap I Fill

Claude Cowork launched on January 12, 2026—macOS only. Windows and Linux users represent a significant untapped market. My platform already runs on all three operating systems.

Platform	Claude Cowork	AGI Automation
macOS	✓	✓
Windows	✗	✓
Linux	✗	✓

Additional production-ready capabilities:

- Multi-LLM orchestration (Claude, GPT-4, Gemini)
- Browser automation (Playwright/BiDi)
- Permission & sandboxing systems
- Real-time streaming + token optimization

What I Built

Metric	Value
GitHub Commits	725+
Lines of Code	465,000+
Rust Command Modules	67
State Management Stores	39
Development Time	12+ months (solo)

Tech Stack: Tauri 2.9 (Rust + React), plan-act-observe agent loops, scoped permissions with audit logging, real-time WebSocket streaming, SQLite with cloud sync, Playwright E2E tests.

My Background

- **Education:** MS Computer Science, University of Texas at Arlington (2025)
- **Certifications:** Google Cloud Engineer, NVIDIA LLM Applications (RAG, LangChain)
- **Technical:** 250+ LeetCode Hard problems, production Rust/TypeScript/React experience
- **Entrepreneurial:** Founded AGI Automation; Co-founded Siddhartha Infrastructures (\$1M+ revenue)

Proposed Terms

Included in Acquisition:

- Full codebase and intellectual property
- All platform technology and architecture
- My full-time employment at Anthropic

My Role Post-Acquisition:

- Join Claude Cowork, Claude Code, or agent systems engineering team
- Contribute immediately to cross-platform expansion
- Bring production learnings to accelerate roadmap

Timeline: I am actively exploring options and can move quickly on the right opportunity.

Why This Makes Sense

- **Speed to Market:** Acquiring working cross-platform code is faster than building from scratch.
- **Proven Builder:** I independently built what your team shipped. That alignment reduces risk.
- **Domain Expertise:** I understand agent safety and permission models because I solved them.
- **Competitive Advantage:** This technology could go to a competitor. Better it strengthens Anthropic.

Next Steps

I welcome a conversation to explore this opportunity:

1. **Introductory Call** — Discuss strategic fit and mutual interests
2. **Technical Review** — Code walkthrough or architecture deep-dive (under NDA)
3. **Terms Discussion** — Align on acquisition structure and role

Siddhartha Nagula
